These are 4-week intensive courses designed to introduce students to a foreign culture through the development of basic skills in the language (listening, speaking, reading, writing). Students engage in conversations, obtain information, and express feelings and opinions. Instructors create an immersion experience through situations that resemble real life in cultures where the language is spoken. Coursework is enhanced with multimedia materials, one-on-one work with conversation partners, and trips to local centers, museums, restaurants, etc.

Registration starts in March 2009
