

## **Town of Erie**

(updated April 20, 2004)

### **The Town of Erie is currently under a voluntary water conservation program.**

Erie residents are asked to voluntarily comply with [Action Level 1](#) of the Town's Water Conservation Program, which calls for twice-weekly lawn watering.

Under Action Level I, residents with even-numbered addresses are asked to water on Sunday and Thursday and residents with odd-numbered addresses are asked to water on Wednesdays and Saturdays. Lawn watering is recommended between 7:00pm and 7:00am. For example, if your watering day is Thursday, please water between 7:00pm on Thursday and 7:00am on Friday.

### **Our Goal**

It is the Town of Erie's goal to actively manage the water situation, to provide our customers with high quality water and excellent service, to advise the Board of Trustees when conditions warrant, and to be stewards for water-wise practices.

### **Implementation of Water Conservation Program**

The Town has intentionally developed a diverse water portfolio in order to provide enough flexibility to meet customer demands under most conditions. We continually monitor and adjust water rights, leases, and deliveries to meet the anticipated demands. Moreover, we continually monitor and adjust our operations and procedures to manage the demands.

When certain "trigger" conditions are reached, we will react in kind to implement planned, water reduction actions (water conservation action levels).

Please go to the Town of Erie website at [www.ci.erie.co.us](http://www.ci.erie.co.us) - then click on the "water conservation" link.
